17th January 2024

Network AID Vehemently Condemn the Social Media Post Audios & Videos of Military Personnel Attack/Protest

Network AID been a voluntary, nonprofit organisation that seeks to enhance the welfare and wellbeing of illiterate women and girls, youths, persons with disability and deprived children to have a healthy, safe, inclusive, and corrupt-free society where they are recognized, respected and identity protected

Network AID joins the Government of Sierra Leone through the Ministry of Defence and Ministry of Information and Civic Education to vehemently condemn the social media post audios and videos of military personnel attack or protest.

We view such post as disingenuous to the security apparatus of the state especially the military that seeks to provide, protect the territorial integrity of the state and its people; and upholding the constitution.

As a country going through tough times, as citizens, we have a civic responsibility to provide factual information to the public and support the growth of the country by meaningfully engage the state, and non-state authority.

Network AID thank the Ministry of Defense and the Ministry of Information and Civic Education for the swift rebuttal of the social media disingenuous post. And of cause the public for going about their daily routine.

END
